Maintenance and repair

Maintenance Contracts

You want to keep the best installation of your laser machine tool.

We propose maintenance contracts adapted to yours needs for best price. SERVILASE carries out programs of preventive maintenance allowing a follow-up and an optimization of your production (significant reduction of the breakdowns machines)

Repair and breakdown services

You have a problem on your laser machine tool.

We intervene quickly and efficiently everywhere in Europe on all types of machines laser TRUMPF and BYSTRONIC

Technological partner with leaders of laser machine tool, we intervene in subcontracting on the all range of their laser machine tool.

We intervene on your electrical equipment and peripherals parts (cooling unit, compressed air, assisted cutting gas ...)

SERVILASE proposes a whole of services adapted best turn-key to your company

Spare parts

SERVILASE markets spare parts and consumables:

- Optics laser (lenses, mirrors, windows, ...) •
Laser glass (plasma tubes, ...)
- Consumables for laser head cutting (ceramics, nozzles, ...) •
Consumables maintenance (oil, cleaning kit, ...)
- Protective bellows (optical and mechanical)
- ... others electrical, hydraulics, pneumatic parts

We make spare parts of Bystronic, Trumpf, Amada, and Precitec *...

*This list of products is not exhaustive

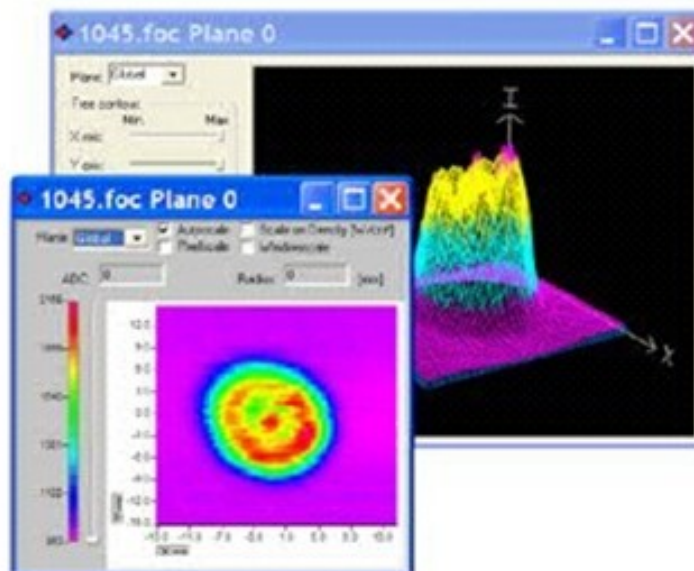

SERVILASE Diagnostics

We have diagnostics for your installation:

- Measurement of the laser mode (PRIMES analyzer)
- Measurement of the laser spot (PRIMES analyzer)
- Measurement of air optical path (KIMO analyzer)
- Measurement of humidity rate (KIMO analyzer)
- Measurement of the deep point (KIMO analyzer)
- Measurement of the quality of the cooling water (analyzer BISCHOF) •
- Detection of vacuum leak
- ... others diagnostics

Industrial training

We are accredited by a French organism to deliver industrial training adapted to your installation.

- Laser Safety
- Laser processes
- Programming
- ... others trainings periods adapt to your job shop

Second Hand Laser Machine

We propose second hand laser machine tool repairing by SERVILASE

You relocate your unit, you expand your factory, you wish move a laser machine tool

SERVILASE plans and makes the move quickly and efficiently

Research and Development

You want to develop new laser applications or optimize your production. SERVILASE proposes you innovative solutions adapted to your company. We have contacts with French university and European Research Center.

We are member of the "Club Laser et Procédés "(French corporation of laser users)

SERVILASE has developed the lens, which are adapted to laser Bystronic from 2800W to 4000W to increase the cutting speed of 35% and more (This is not a low absorption lens).
